DOUBLE-FLOWERING DOGWOOD. One of the most beautiful of the Dogwoods. Its very double, showy white blooms appear about ten days later than those of the Cornus Florida, thus prolonging the Dogwood blooming season. Trees produce flowers at an early age. New MONTMAMMOTH *Sour* CHERRY

Montmammoth
Cherries

MONTMAMMOTH SOUR CHERRY

A sport of the Montmorency. Bears the second year — no waiting for fruit. High quality cherries are large—often caliper-ing an inch in diameter. As the tree is dwarf and spreading in growth, is much easier to pick than other varieties. Heavy pro-ducer—3 to 5 fruits per spur. The parent tree was one-year-old when planted, which was 29 years ago, and it produced a 6-gallon-crate of fruit the third year. Long lived — an orchard will be a life-time investment.

We offer one-year-old, 7/16 inch, 2-3 ft. trees, \$1.50 each; 3 for \$4.35; 10 for \$14.00.

New RED LEAF PEACH

The Sensational New Fruit Ornamental

Something entirely new in an ornamental! Many ornamental trees have been offered with colored foliage, but never an ornamental peach tree with **RED FOLIAGE**—bright red early in the spring, gradually dulling to a deep maroon towards fall. Its deep-rose-blossoms against the red foliage create a most pleasing contrast with your other plantings—the tree you have been looking for to put in a special place to be admired and envied by your neighbors.

Would advise you to order early, as our supply is limited. We offer these trees at the following low price: 4½-5½ ft. trees, \$1.25 each; 2 for \$2.00. Not prepaid.

Giant Cultivated BLUEBERRIES

One of the biggest money-makers as a commercial proposition. An attractive ornamental from early spring until late fall. Heavy producer—four bushes in your yard will provide enough berries for Blueberry pie throughout the season. As an ornamental shrub, the Blueberry cannot be surpassed; are full of pink buds, which open into bell-shaped, white flowers, starting in June. Blueberries must have an acid or semi-acid soil, good drainage and moderate supply of moisture.

Cultural instructions on the planting of Blueberries included with every order.

The 4-, 5-, and 8-year-old bushes will produce this year. Remember, the older the bush, the more berries and profit you will receive.

We cannot guarantee varieties in 4-, 5-, and 8-year-old, but they will consist of all good kinds.

PRICES OF BLUEBERRIES—Not Prepaid

We offer 4 varieties in the 1-, 2-, and 3-year. Rancocas (early to midseason), Harding (midseason to late), Jersey and Rubel (late).

Bargains for FALL PLANTING

DON'T BE DISAPPOINTED PLANT STRAWBERRIES THIS FALL

Due to labor shortage, the available supply of strawberry plants is not large. Why wait until spring and possibly be disappointed? Plant this fall—be sure of getting the varieties you want. Fall set plants will make some root growth before ground freezes and be all ready to make a quick start when the frost is out of the ground in the spring. Wet weather, in the spring, often holds up planting until too late to get a good start. We have set out ten acres every fall for several years and have found this the most ideal time. Further, due to the cool weather, plants are not apt to heat in transit. Although it is not absolutely necessary, it might be well to mulch the plants after the ground has frozen solid. Don't wait—plant this fall and be sure of a nice patch of luscious red berries. All plants are twice state-inspected. Stock will be fully matured and ready for shipment October 10th, and can be planted until the ground freezes.
